ICESTE H 2014

## JNP organizes the 1st International Conference on Engineering, Science Technology, Education and History (ICESTE H 2014)

*Thinley Wangmo, Asst. Lecturer, Sc. & Humanities*

Jigme Namgyel Polytechnic in collaboration with the Japan Society of Education for the History of Technology (JSEHT) organized the 1st International Conference on Engineering, Science Technology, Education and History (ICESTE H) from 21st – 22nd August in Thimphu, this year.

With the theme “GNH through Engineering Education and Knowledge Transfer”, the conference was the first of its kind to be held in Bhutan. Topics included Engineering, Science, Technology, Education and History from a technological perspective that are current and relevant for Bhutan. The conference was aimed at promoting knowledge transfer and information exchange in the field of science and engineering between the academics and researchers of the two countries.

information exchange in the field of science and engineering between the academics and researchers of the two countries.

The conference was also aimed at establishing academic linkages between RUB and relevant institutions in Japan, facilitate networking amongst professionals in the field of engineering and science, and facilitate Bhutanese researchers to showcase their research work to accomplished and experienced international academics and researchers and enhance their research capability. The conference will also provide an opportunity for cultural exchange between Japan and Bhutan.

A total of 23 technical papers were presented by professionals from various organizations in Japan and Bhutan. Out of the 23 technical papers, 9 papers were presented by Bhutanese participants and 14 papers by Japanese professionals.

The conference was supported by the Institute for GNH Studies (RUB), Ashikaga Institute of Technology, Japan - Bhutan Friendship Association, NPO Society of Expert for Construction Equipment, Technology and Society Division of The Japan Society of Mechanical Engineers and Japan Society for Design Engineering.

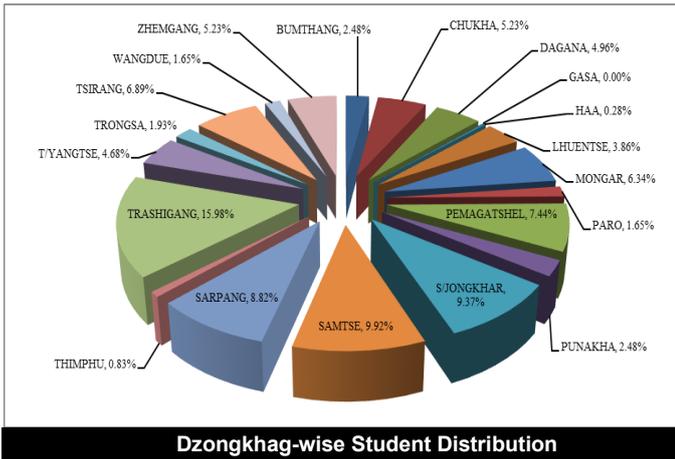

## A Graphic Glance of Student Population at JNP

*Karma Drukpa, Dean, Student Affairs*

After completion of Bhutan Higher Secondary Examination Certificate (BHSEC) in the year 2013, with 2511 Science students, 14.5% students were enrolled in Jigme Namgyel

Polytechnic (JNP) this year. As compared to the intake of 2013, there is an increase of only three percent in students' population.

Although the Institute had enrolled only 14.5% of students from the country yet students are represented from all dzongkhags. Except for Gasa Dzongkhag followed by Haa, Thimphu and Wangduephodrang with only one, three and six students respectively. [\(page 2\)](#)

The highest number of students come from Trashigang, the largest dzongkhag with 58 students. Including Trashigang the total intake from Samtse, SamdrupJongkhar, and Sarpang and Pemagatshel dzongkhags make 51.5% of students.

The largest number of students undergoing Diploma course at JNP; every year is from Trashigang dzongkhag with 104 stu-

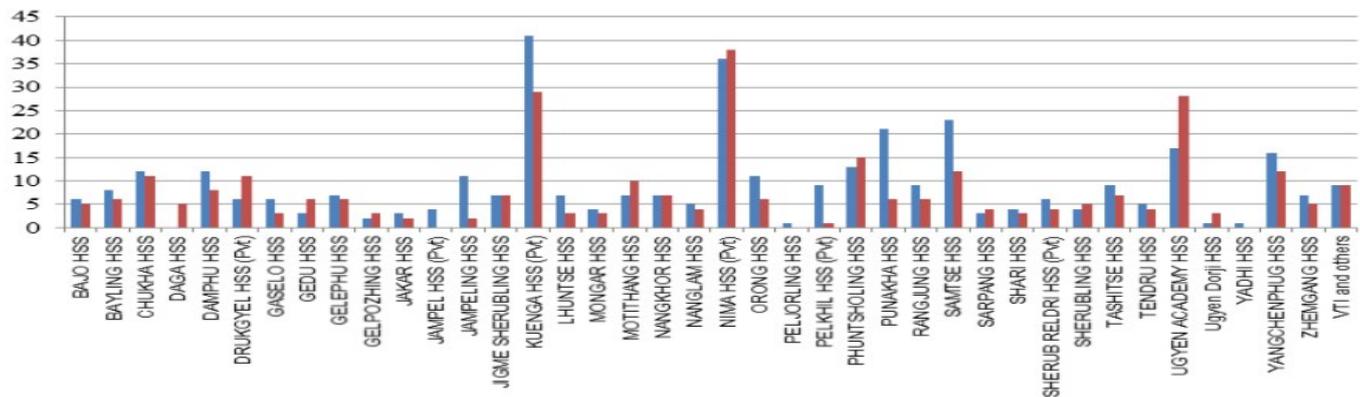

dents followed by SamdrupJongkhar, Samtse and Pemagatshel.

As usual the female population is always less in JNP. In 2013 it was around 25% from 363 total students while in 2014 it is 24.2%.

Consecutively the highest numbers of students were enrolled from Nima Higher Secondary School, Thimphu with an average of 37 students. Thereafter Kuenga higher secondary school in Paro followed closely with an average of 35 students. From 44 HSS in the country 36 HSS qualified students were enrolled in JNP. However this year, 3 more HSS were increased adding to the student diversity.

The above analysis is based on students number enrolled in 2013 and 2014. It excludes the students repeating and includes In-service students.

Currently, there are 742 students studying in six different Diploma programmes. In the next academic year, JNP will have more intake of student with the inception of Diploma in Stores and Procurement Management and B.E. in Power Engineering.

## Waste Segregation Project

Norden Wangchuk, Assoc. Lecturer, MED

The waste segregation station project was initiated with a joint collaboration between the Centre of Appropriate Technology (CAT) of Jigme Namgyel Polytechnic and Samdrup Jongkhar Initiative (SJI). The main purpose of this project is to create healthy living environment and proper place for disposal of waste. The project was proposed by SJI with the support from UNDP-GEF grant.

The main task for this project was carried out by a group of students pursuing Diploma in Mechanical Engineering at JNP as an academic project. The task included fabrication works where the raw materials were purchased from the

Students installing Waste Segregation Station

fund received. The fabrication of waste bin was based on the winning design from the open competition organized by SJI at JNP.

The group fabricated a total of five segregation stations for Chokyi Gyatsho

Shedra at Dewathang. One waste bin bears a rotating feature for convenient usage, while other four were of much simpler design. For both design, five collecting bins for different kinds of waste are attached to the main stations with provision for emptying the bin conveniently.

This particular project has been one significant opportunity for all the personnel involved, in collaborating, learning and rendering support. More importantly, the project has made a possible contribution to the nearby communities (Shedra) through the genuine support from the institute.

## Bhutan in World Chess Olympiad

*Cheda, Associate Lecturer, MED*

**B**hutan for the first time in the history, participated in the 41<sup>st</sup> World Chess Olympiad held in Norway from 1<sup>st</sup> August to 14<sup>th</sup> August, 2014.

The journey of Bhutan's participation in the International Chess began under the sponsorship of All India Chess Federation. Out of 51 participants in the National Premier Chess Open Championship which was held at Thimphu from 9th May -11th May 2014. Top five winners were selected to represent Bhutan in Norway.

Amongst five winners, Mr. Cheda, lecturer at Jigme Namgyel Polytechnic (JNP) is one of the participants, who represented the country. He was awarded as champion of the National Chess Open championship held in 2004 and 2014 of Bhutan respectively.

After 10 rounds of matches played in the 41<sup>st</sup> World Chess Olympiad, Bhutan

**Mr. Cheda and his team mates getting trained from the former Commonwealth Champion, Mr Atanu Lahiri**  
Photo courtesy : <http://www.thehindu.com>

ranked 170 out of 177 participating countries with one win, two draws, and eight losses at international level. After taking part in the first ever International Chess Competition, Mr. Cheda and one of the Bhutanese participants received Federation Internationale des Echecs (FIDE) ratings of 1568 and 1804 respectively. This made the first international rated chess players from Bhutan.

"It was a great honor for us to represent

our country in such a high level International Chess Competition and take Bhutan into the international level chess for the first time in the history." said Cheda. He also mentioned that participation is more important than winning as it gives way to learn through participation and gain experiences to perform better in future events.

"We have realized that we have to work hard and there is lot to learn for Chess enthusiast in Bhutan. If we work hard, there is surely a potential future for Bhutan in the field of Chess sports." He added.

As a chess enthusiast, Mr. Cheda took initiative in forming a Chess Club at JNP with the assistance from All India Chess Federation. The main objective of forming this club is to encourage and promote Chess sport at JNP, and for the benefit of many in the region. This club will basically provide facilities, coaching and conduct tournaments for the chess lovers in future.

## Building Entrepreneurial Skills through eClub

*Purnima Pradhan, D2CHN*

**W**ith the growing number of population in the nation, the issues of unemployment appears chronic. Therefore one must learn and realize individual's responsibility in creating one's own employment opportunities.

Viewing such employment crisis, Jigme Namgyel Polytechnic has formed entrepreneurs club, popularly known as eclub. The club mainly aims to enhance the entrepreneurship skills of the students.

Currently the club headed by Mr. Hemlal Bhatarrai (Head of Electrical Engineering Department) as an adviser with 72 members. The members of the club aim to develop their knowledge on how to start the business, gain experience from the task given to the club and develop innovative ideas.

Led by the President, Mr. Lila Parsad Sharma and Secretary Ms. Kinley Zam from civil engineering department, the club functions with proper plans and discussion of individual's innovative ideas.

In addition, the visit by officials from Loden Foundation, one of the Non-governmental organizations gave clear direction towards proper functioning of club. They shared the concept of Loden SEED (student empowerment through entrepreneurship development) to the members. As an encouraging remark and support, the organization donated Nu 50,000 to the institute for a smooth functioning of eclub.

Therefore, the club never misses the opportunity to have an open carry stalls whenever the institute launches a sport events, programmes or gatherings.

During the Eastern Region Royal University Sports Federation of Bhutan (RUSFoB) Tournament, the eClub member did a small business of selling home-

made fast foods. The business turned to work quite well since the club gained a good amount of profit from the actual investment.

The capital investment was just sum of Nu. 10,000 of which the profit gained was 37.15%. The members rejoiced over the achievement and made a commitment to work even harder next time.

Another milestone achievement for the eclub was signing a memorandum of agreement with Tashi Infocom Limited on September 20, 2014. The club had set up a Tashi Cell Business Center within the campus. It was mainly to gain experience and ideas on business and make the community avail the services of Tashi Infocom.

Today the center provides services such as selling of sim cards; recharge Vouchers, E-load vouchers, handsets, GSM phones, Data cards, and SD Memory cards. The service is available from morning 9:00 am till evening 6:00pm.

## YOGA – the science of integrating body, mind and soul

Natasha Kakati, Asst. Lecturer, CED

“Health is not a mere absence of disease. It is a dynamic expression of life – in terms of how joyful, loving and enthusiastic we are “ said Sri Ravi Shankar. Truly, it is proved by Yoga Master, Dr. K.S. Shaiju, from Nehru-Wangchuck Cultural Center, Indian Embassy, Thimphu.

Under his guidance, three days Yoga programme was held at Jigme Namgyel Polytechnic (JNP) from 8<sup>th</sup> to 10<sup>th</sup> August, 2014. This is made possible through the prior invitation by Director, Dr. Andu Dukpa of the institute with the complete support from former Vice Chancellor, Dasho Dr. Pema Thinley for the benefit of JNP family.

He taught basics of yoga to the participants and also gave presentation on the importance of yoga and Food & Habits

for Healthy Living. His lessons to the participants started with loosening of our body, joints, stretching and warm ups in the evening sessions which ended with ultimate relaxations of our body.

The yoga program began with morning sessions on 'asana' practices, as morning hours are considered as right time for yoga. Dr. Shaiju added that yoga should be practiced in fresh air in presence of pure form of oxygen. In the evening, loosening exercises are practiced on daily basis. In the session, participants learnt *suryanamaskara* (Sun Salutation) which is a common sequence of asanas. It consists of 12 steps which are the sequence of movements and can be practiced on varying

levels of awareness. We also learnt different forms of breathing exercises which led us to both relaxation and energized body.

Some of the impact after practicing from these sessions is weight loss, a strong and flexible body, glowing skin, peaceful mind and good health. Practicing regular yoga not only gives us a perfect physic but also provides mental calmness. We call ourselves truly healthy when one is physically, mentally and emotionally balanced. Yoga unites the body, mind and breathe together which is essential for a healthy life.

Since 8<sup>th</sup> August, all the participants have been practicing yoga till date to generate harmony, happier life in most fulfilling way. As we believe that peace at home and society will ultimately create peaceful nation.

## First Diploma Level Surveying Programme in Bhutan

Thinley Wangmo, Asst. Lecturer, Sc. & Humanities

Until now, there was no particular surveying courses being offered in country to educate and train surveyors in the field. As per the need analysis conducted by Jigme Namgyel Polytechnic in 2008 and 2010, many stakeholders from various organization and agencies felt the need of formal course especially to produce graduates with knowledge and skills in Surveying. With this concern and need, Jigme Namgyel Polytechnic has worked with ease and has been successful in introducing Diploma level course in Surveying in July 2014, which is one of the first course of this nature in the country.

During recruit, there were 39 students as first batch from various schools. The classes started off with proper inauguration conducted on 26th July in presence of Institute's Director, Dr. Andu Dukpa, Head of the Departments, Faculties and students. Having started with Diploma course in Surveying, all Government agencies, Private organisations and Corporations across the country are expected to get trained surveyors to carry out practical tasks by mid of 2016. Otherwise fresh graduates were recruited temporarily to conduct surveys in the country and

some surveyors are being trained outside the country. In future, institute also aims to provide training for in-service candidates from various sectors.

Diploma in Surveying is the third new course introduced in 3 years, achieving yet another milestone towards fulfilling the mission of Institute. Jigme Namgyel Polytechnic is also planning to introduce some more job oriented courses as per the need of country and to achieve in resolving employment issues in nation.

## Helping Hand Club

### Towards Change

Sherub Wangdi, D2C

“We can do no great things, only small things with great love.”

Mother Teresa

Through the members of Helping Hand at Jigme Namgyel Polytechnic; people in-campus as well as periphery of the campus is being benefitted. All these members were inducted purely on voluntary basis and are highly committed to help the local community and stretch their helping hand to all the needy communities of the nation in future.

The members' aims to create happiness to entire faces by helping those physically challenged and communities deprived of basic amenities. Basically the members work for the holistic benefit of the community. Every semester the club plans their activities and avail their helping hand wholeheartedly to entire under-

Helping Hand Members With Beneficiaries

privileged communities.

For this winter semester, the activity started with the inception of cleaning campaign within the institute campus on August 17, 2014. Members vigorously helped the staffs to clear all the bushes and collected all the wastes. After collecting all the wastes for more than five hours, members segregated them from plastic and glass bottles. Those wastes, along with used practical notebooks, unused books and waste papers were sold for scrap. The amount generated from it was saved for providing amenities to unprivileged societies that was recognized after conducting a survey.

During this semester, the club members made a visit to Rikhey Primary School and its community. Further the members went to two other communities

(Marthang and Dongphu), which is around 15 to 20 kilo meters far from the institute.

According to the survey conducted by members around the communities, it was found that most of the school children were not able to afford stationary items for their education. Hence to reach support, the money collected after selling scraps by members were spent in purchasing stationary items for them.

Even many household within the campus donated clothes for the purpose of distribution to these recognized communities. Laundry services were provided by members and distributed to each household through doorstep service.

The way of their living, portrays that the community was in dire need of help. Therefore the Helping Hand Club of the institute aspires to take advantage of its willing and supportive volunteer members in various fields in helping the communities in the vicinity to live an easier live and put the value of Gross National Happiness into practice. Members include multi-skilled technical professional and educators who might render effective support in near future.

Currently the club has 41 students and 4 staff as members; coordinated by Mr. Dechen Dorji as staff coordinator and Mr. Sherab Wangdi as student secretary. It is chaired by Director as a founder of this social service unit.

## Valuable Reflections from the senior most faculty

Purnima Pradhan, D2CHN

Ever since the Jigme Namgyel Polytechnic came into existence, Mr. Krishna Lal Sutar started off his education with the institute and today he attain 30 years of his service to the institute as a senior and most dedicated faculty.

Reminiscing as a student back then, Krishna Lal Sutar shared that the birth of JNP in 1976 created an opportunity to pursue higher education. Else he said that he was without any dream or aspiration and he only cling onto the idea of getting education and become appreciable academician. “My admission in JNP brought light in my life.

After graduating from JNP, Krishna Lal Sutar started his first service in Chhukha for three years where his desire to complete the highest education possible developed. Unfortunately he shared that he was unable to carry on with his desire since during that period of time, helping people was vital than enhancing his education.

When asked about how possible an Electrical Engineering student to adopt teaching profession was, Krishna Lal

Sutar said that his inspiration to be a teacher was the Former Prime Minister Jigme Y Thinley who trusted on his competence. As quoted by Joel Osteen “when you focus on being a blessing, God makes sure that you are always blessed in abundance”,

Hence God have bestowed blessing in abundance to Sutar Sir and finally was able to pursue higher studies which he was yearning for.

According to Krishna Lal Sutar he was very much affectionate of teaching profession since his childhood days and he claims that he used to teach younger siblings back in his village and teach his friends during school days. This according to the first year student Som Maya Rai is true and is very evident from his teaching skills and dedication.

“He is strict yet he is friendly when we interact in person” said Som Maya Rai. Adding that Mr. Krishna Lal Sutar motivates students to work farther with inspirational advices and he is an inspiration for all the students.

Meanwhile another student Karma Choden supplemented that Mr. Sutar is more of like a parents to the students who worry, care and guides every students diligently and evenly.

As it is said “the price of success is hard work, dedication to the job at hand, and determination that whether we win or lose, we have applied the best of ourselves to the task at hand”. Our Sutar sir had paid that price for his success. For his 30 years service, Krishna Lal Sutar was honored with a Gold medal and certificates by His Majesty the Fifth King

last year. Yet his humble thought moved me as he shared that he is contented with his work towards nurturing JNP and achieving the finniest growth today. “More than a medal I am happy for what I could do for the institute” he said.

Serving the institute for 30 long years, time and age demands for superannuation and he have to leave the institute this year. “I finally bid farewell to this institute” said Sutar, with pearls in his shrunken eyes. He added that his weary body denies going away from the institute and would always have the similar concern for the students and the institute even if he leaves.

He also said that he spot students getting indulge into substance abuse, fights, leave studies and least bothered about the future. He shared that he regret for he could not be of any help to those students with humble background and he said that it’s heartbreaking to find out that about 25% of the students in the institute come from very poor family.

The dear teacher would finally leave this institute who tirelessly worked hard for the wellbeing of the students and it is very unfortunate for the institute and students. However his love, compassion, care, and sacrifices that he made for us will be always remain close to our heart. We shall always remain indebted and teacher like Sutar would be always remembered.

He had proved that “a good teacher is like a candle – it consumes itself to light the way for others”.

*“ ... IF OUR VISION FOR THE NATION IS NOT CONTAINED IN THE PAGES OF THE BOOKS THAT OUR YOUNG CHILDREN HOLD, IN THE WORDS OF OUR TEACHERS AS THEY LEAD THEIR CLASSROOMS, AND IN THE EDUCATION POLICIES OF OUR GOVERNMENTS THEN LET IT BE SAID – WE HAVE NO VISION,” HIS MAJESTY TOLD THE PEOPLE RECENTLY. HE HAS ALWAYS REMINDED THE PEOPLE THAT, “A NATION’S FUTURE WILL MIRROR THE QUALITY OF HER YOUTH – A NATION CANNOT FOOL HERSELF INTO THINKING OF A BRIGHT FUTURE WHEN SHE HAS NOT INVESTED WISELY IN HER CHILDREN.” — HIS MAJESTY KING JIGME KHEGAR NAMGYEL WANGCHUCK*

## Election of Councilors

*Pani Raj Koirala, D2C*

The election of student office bearers at Jigme Namgyel Polytechnic is one of the significant event held after completion of every one batch. The selection of students as nominee and its election process are followed in a systematic way indicating accountability and transparency among students and staff of institute. This way it also shows the value of democracy in choosing the right leader for the benefit of many.

The family of Jigme Namgyel Polytechnic gathered for the election of councilors from student body on 25th July, 2014. The program was headed by Director, followed by Deans, Head of Departments, faculties, staff and students. The post of student office bearer include:

- One Chief Councilor
- One Women Representative
- Four House Councilors
- Four Vice House Councilors
- Four House Masters

For the election of Chief Councilor, all the members present voted. Among the selected nominees by the faculty, staff and students, Mr. Lhab Dorji, of second year civil got the maximum votes of 157 securing his position over other nominees. The Chief Councilor will serve as the overall head in the student body and act as a bridge between the student and management of the institute. The Woman Representative is elected through votes by all the women members and staff. Tandin Zam of second year civil, among the eleven nominees took over the position with 29 votes. On appointing, she will look

into the welfare of women students and assist Chief Councilor with overall responsibility.

After the first round of session, election of house councilors has begun next. They are also elected through the ballots systems. House vice councilors was selected among the students from the respective houses to assist the house councilors.

Director said, "this is the special occasion to select the best leader who can help and work harder to bring the changes in the Institute". All the councilors have their own responsibility in

**Elected Student Representatives with Director, Deans and Department Heads**

their own field and they promised to take their job sincerely where all elected members have to take Oath of Allegiance to prove their diligence and way forward positively.

At the end of the session, there was the election of house masters. House masters are nominated from all the faculties by students. Following the same process, four house masters are selected on the basis of the highest votes. Through Lucky Dip, all four elected house councilors further select their house (Taag, Singye, Druk and Chung) and house master.

The day ended significantly with much hope and expectation from the chosen leaders.

### Picture Speaks : Why should man have all the fun?

Dasho Aum Neten Zangmo, the Chairperson of the Anti-Corruption Commission (ACC), the then Principal of Royal Bhutan Polytechnic now known as Jigme Namgyel Polytechnic, participating in the tug-of-war along with the male colleagues during the annual sports meet at Wangchuk Stadium, Dewathang in 1990.

# Taag House: The Ultimate Winner

Roshan Gurung, D2C

As Dean of Student Affairs (DSA), Karma Drukpa walked up to the stage, everybody in the hall was eager to hear the declaration of house competition. The hall was filled with silence till he raised and placed his laptop on the podium. Abruptly the hall was crammed with tumultuous applause when he raised the microphone and tapped on it.

Like any other house competitions in the educational institutes, Jigme Namgyel Polytechnic too conducts such competition to impart wholesome education to the students. The institute has four houses; Taag, Singye, Chung and Druk. Thereby, all students are divided into four different houses. After every semester the competition result is declared.

To instill the intense vibe in the hall, the Dean of student affairs gave an introduction on students' hard work to make the competition more competitive and hereafter expect to be more competitive. Further, DSA explained the floor with award categories.

The first position holder will be awarded with a rolling trophy and Nu 10,000. Hearing about the first prize the silent audience turned out to be boisterous crowd. Thereafter he continued announcing about the second prize that is Nu. 7000. While third and fourth will be gifted with "Round of applause" for their active participation.

Before announcing the result, DSA said "the winner matches in every field." Audience then started to make an assumption on

who could be the winner. Most took it as a hint but still they were skeptic about it.

The eager students screeched out their houses' name still DSA was tying up the suspense. Up on the stage, he was graciously smiling and enjoying the students' enthusiasm and love for their respective houses.

As he started to speak, the audiences were silent with their eyes filled with excitement, ears sharpen to hear and heart beat ran as if they ran on an Olympic stadium.

Finally the DSA uncovered the result of most awaited moment. He said "the overall winner for the end-semester house competition is Taag house."

The hall was exploded with lots of happiness and patience they kept for long intense hours were poured out with clap and whistle.

The winning prize was given to the house master and the councilors by the Director Dr. Andu Dukpa.

Once again the hall was filled with applause for the second winner that was Chung house. All the members and their friends were rejoicing over that.

In addition the winning houses took their prizes and walked amidst the crowd expecting more cheers and appreciation.

Thereafter, Singye and Druk house stood third and fourth position respectively.

The event was concluded with vote of thanks from DSA and appreciated for the students' active participation and having the sense of belonging for their respective houses.
