A Leading Scout

-Pradeep Gurung, D2MPM

When the opportunity knocks at the door, do not shy away simply. There are many opportunities that are provided to students at various level. Scouting is one of the opportunities provided among the aspiring individuals that helps one to foresee direction in serving the Tsa-Wa-Sum (King, Country and People)

Mr. Phub Dorji joined scouting in 2010, knowing that it would benefit him to serve the Kingdom better. As a young scout, he was attracted to the reward system and also some of the adventurous activities. He says that with the moral support from parents and elders, he was encouraged to join and continue scouting.

In 2014 he achieved Toenpa Badge, a badge provided based on the achievement in the systematic ranking. He also underwent Scout Leadership Course in 2014 and achieved BULT (Basic Unit Leaders Training) warrant, which is the first rank for scout leaders in warrant system. Currently he is serving as a rover scout in Jigme Namgyel Engineering College.

According to him, "scouting is a program driven for the wholesome development in terms of physical, emotional, intellectual, social and spiritual aspect of an individual. It builds one's potential and skills enhancing the personality development uploading the values." He further added that the scouting holds the principle of "Duty to god, duty to others and duty to self" which integrates distinct identities to create a better world.

He inspires others to join scouting by saying that, "we are living in a time of competency and globalization with rapid developmental activities taking place. Scouting is a program emphasizing on development of an individual with preserving and promoting our respective identity and at the same time adhering to the changes happening in and around our environment."

As a way to educate young minds, Mr. Phub Dorji stands as a life example to the aspiring youths to take up the opportunity provided to them.

She grew before her age

– Sonam Lhamo D2MPM

She craved for the love of a family, nag her mom and dad just like any normal child does. She always put on a big smile on her face whenever she notices the kids with their parents. Though her heart was crying silently, a smile always ran across her plummy cheeks and her big eyes glittering.

She was only about 2 when she lost her father. Her biggest regret was not having a memory of her dad. Things started to change after the decease of her dad. Her four other siblings got separated. She was send to her hometown where no one took time to pour some affections she deserved, at least from her grandparents but she got none. She remembered how her cousins was always prioritized since her dad was by her side.

Lucky for her things started to change in her favor, when finally her patronal aunt came for her. Her mother came to get her. The innocent little girl was mesmerized and couldn't keep her eyes from her mom whom she could not see for months. Who didn't know she was going to get separated from her mom yet once again.

Her mother reached her till the aunt's house to her surprise she was left among the unfamiliar faces. That day she soaked her pillows with her tears, she missed her but to think she was left once again the little heart of hers could not take in. Still then she never resented her mother for leaving her. She grew up under her aunt's guardian. She went through a lot. From a small age she knew and saw why she couldn't live with her mom and took every little chance she gets to hold her mothers hand. She missed her but never complained about it to her mother. She always cried when her mother visited and she have to see her off again.

She concurred a hurricane storm so called a teenage life. Being brought by someone other than who's responsible for her she hid her scares well. She knew she could not be with her mom though she craves her warmth and care. In fact she was lucky to be brought up in such a lovely family and that's her fate. However she grew up well and did made her only mother and guardian proud. Life is such a roller coaster isn't it ?

The Society Today

-Compiled by Pradeep Gurung, D2MPM

Time has arrived where parents get scolding's from their children due to their illiteracy and lack of knowledge about present situation. They are ignored, disrespected and tortured by their otherwise lovely sons and daughters. Today the children are not able to help their parents but the parents have crossed all the hurdles to accomplish goals of their children.

Commitment in marriage lives have decreased drastically. The divorce cases are increasing day by day due to external affairs. Despite being married, people often get involved in illicit relationship, undermining implication in the future society. Time that one should be spending with family members are wasted in unhealthy practices such as taking alcohol, hanging with friends and doing illegal activities. Such unhealthy practices result in disharmony of a family.

Corruption grows as fast as anti-corruption commission's hard work increases to terminate it. The boss and the subordinates are in war of accusing each other for corrupting which deteriorates their working condition and gradually it gets ruined. Family values are getting influenced by exposure to various cultures. The parents-child relationship is declining and gap between them has gone far and so is the student-teacher relationship.

The society today is full of problems such as disrespect to the parents, divorce cases and corruption. The cause of such problems cannot be blamed to one another rather it is important that we realize our roles and responsibility in a society. If everyone is responsible to what they ought to do then many of such problems would be solved.

Move for Health

-Pradeep Gurung, D2MPM

In commemoration with Birth Anniversary of Gyalsey this year on 5th February, the Ministry of Health organized a show at clock tower. The theme of the show was "Move for Health" where various dignitaries from across the world participated.

In the event various cultural dances were performed. The dignitaries talked about the importance of health to the hundreds of audience. Lyonchen Tshering Tobgay addressed that, "The health and medicine services was free till today and this won't be spoiled by current government and either it shall be destroyed by upcoming government." Health facility that has been recently adopted are radio therapy, helicopter services and free medication services for the abroad treatment.

Lyonchen also said that, "Bhutan is the only country where free health facilities are provided by the government therefore it is important for the people to realize the value of their health". The health facilities that are provided must not be wasted.

Its important for everyone to have their health taken care. Many dignitaries shared that people suffer from life style diseases. Regular exercise might help one to remain healthy instead of getting accustomed to modern ways of living by simply relying upon technology for every purpose.

The show ended with lucky draw where everyone was eager to know the result. The show was organized to create the awareness of importance of health.

Jigme Namgyel Engineering College

-Pradeep Gurung, D2MPM

Many had come and gone,
But the memories has not been forgotten.
In the high hills of bliss,
Lies the alter of happiness.

Like the fast flowing river,
The time has gone forever.
Yet the wisdom offered,
Last ever and ever.

Situated in east,
The college is vast.
Educating the number of young minds,
For the development of its kinds.

Summer is full of rain,
Yet learners wont mind taking pain.
For the pain turns into gain,
With the development of insane.

Winter is cold,
So does the student s hold.
With their hopes so bold,
With the objectives to uphold.

Civil engineers are so fond,
With the developing bond.
Electrical engineers play with electricity,
With the objectives developing city.

There are several machine lover,
Turning them a mechanical engineer.
While the measurement lover,
Turns to be a surveyor.

Development of modern technology,
Calls students to learn Information Technology.
While the need for procurement profession,
Calls the nations attention.

With the varied knowledge ,
Students prefer coming college.
As soon as the graduation,
The engineers would serve the nation.

Prayer to Ugyen Jungwa Zhi

—Compiled by Sonam Lhamo, D2MPM

With shocking waves shaking the wobbly knees,
And fault line cracking across my back.
In falling apart of hepatic shops,
May tremor rock this fool to sleep.

For Vulcan cone is heartless doll.
Eruption of her filthy words,
Noxious fumes above her rise.
Magma of lies flow in waves.

As river of passion rages and drowns
The Lams, Khandoms and fishes too.
When the rescuer fails to save own self.
Raise us from this 'Khorwa' in flood.

Hold us lord, with net of forgiveness.
Save us lord, with the hook of compassion.

HIGHLIGHTS

JNEC club happening Y-Peer

Along with the nations, on 8th of March Jigme Namgyel Engineering college celebrated the “International Women’s Day”. The program was coordinated by the Y-Peer Club to mark its significance. President, Deans, faculty, staff, and students participated in the event. The day marked the women’s achievement throughout the nations without any division, nationality, cultural, economic or political distinction. The day is also known as the United Nation (UN) Day for Women’s Rights and International Peace.

JNEC Open Football Tournament

Jigme Namgyel Engineering College organized 4th JNEC Open Football Tournament 2018 with the theme “*Empowering youths through sports: to become agent of change.*” The match was kicked off on 3rd March at Thangzor sport complex with 17 teams participating from various places including Pemagatshel and Ngalam. The opening match between JNEC & Samdrup Jongkhar Thromde was grace by Colonel Tshering Nidup, Commander of Wing-X RBA and Dewathang. Where JNEC has the highest records of 7 goals and Dashp Chundu Tshering with the highest score of 6 goals.

The celebration began with Marchang, national anthem and followed by zabten to His Majesty's long life and good health. Series of programs were showcased after President's address to the gathering. The celebration concluded with Tashi Labey.

The matches is still in full swing and students are witnessing the matches and the final will be played on first week of April.

National Start-up weekend held in JNEC

On 12th Feb, 2018 the Department of IT & Telecom (DITT), under Ministry of Information and Communication in collaboration with Thimphu Tech Park organized a day long business Pitching Idea event for Jigme Namgyel Engineering College where many business ideas were selected. Currently 20 students and 3 faculty are at RIM Thimphu for National Level competition on business pitching. JNEC team won a special award for social impact category by their idea on pad vending machine and awarded first prize in cultural competition.

HIGHLIGHTS

JNEC Signed MoU with DRE

The Department of Renewable Energy (DRE) under the Ministry of Economic Affairs and Jigme Namgyel Engineering College signed the Memorandum of Understanding (MoU) on 19th February, 2018. The two organizations will hereafter collaboratively fulfil the shared goals and objectives of both organizations. It will also identify training needs in areas of renewable energy and energy efficiency for both and work together to seek and mobilize necessary funds for renewable energy and energy efficiency programmes. The MoU was signed by the Director of DRE and the President of the college. The term of this MoU is for a period of three years from the date of agreement and may be extended on mutual agreement.

Training On Procurement and Contract Management

The training on Procurement and Contract Management is being held from 5th to 10th March, 2018 in Jigme Namgyel Engineering College to 10 officials from Phuntsholing Thromde under Chukha Dzongkhag. The training aims to provide comprehensive knowledge and skills on the procurement and contract management processes including the materials management to enhance the productivity and cost reduction measures. The college has been training various participants from across the country in the core components of procurement and contract management area.

Seminar on GIS: Application and Possibility

On 8th March, 2018 Jigme Namgyel Engineering College participated in the collaborative seminar organized by the Japan International Cooperation Agency (JICA) and National Land Commission Secretariat (NLCS). The Seminar on Geographic Information System (GIS) and its Application and Possibility was held in College of Science and Technology, Sherubtse College and also JNEC mainly to advocate on Geospatial Information.

Fun Facts

1. A red panda is an animal native to the Himalayas and southeast China. The English word for red panda is 'Firefox' which is where the browser gets its name from-so the logo is actually a red panda, not a fox.
2. Long time ago, people who sacrificed their sleep, family, food, laughter and other joys of life were called saints. Now, they are called engineers.
3. In general, people tend to read as much as 10% slower from a screen than from paper.
4. In Japan 90% of mobile phones are waterproof, as many people even use them in shower
5. The world's First camera took eight hours to snap a photo.
6. On the average work day, a typist's fingers travel about 12.6 miles
